

# FIZA SHAIKH

Security Researcher · Blockchain Builder · Eternal Learner

fiza.sk293@gmail.com | linkedin.com/in/fizashaikh293 | github.com/FizaShaikh293 | credly.com/users/fizashaikh293

---

## PROFILE

Cybersecurity & blockchain enthusiast passionate about breaking things (ethically) and building them back stronger. Focused on smart contract security, network defense, and decentralized systems, with a growing interest in AI and Machine Learning for security applications.

## EXPERIENCE

### IT Security Support Analyst

Teleperformance — Mumbai, India

Jul 2023 – Sep 2024

- Triaged 30+ security-related support escalations per week, identifying phishing attempts and social engineering incidents targeting enterprise customers across North America.
- Conducted first-line email threat analysis using Wireshark and manual header inspection, flagging ~15% of escalated cases as confirmed phishing or suspicious activity.
- Reduced average incident resolution time by 20% by developing structured triage checklists and escalation workflows aligned with SOC best practices.
- Documented 100+ security incidents end-to-end using ticketing systems, contributing to knowledge base articles that improved team response consistency.
- Supervised and mentored a team of 8 associates, monitoring KPIs and enforcing quality and security standards, maintaining CSAT scores above 92%.
- Used Burp Suite for basic web request inspection during escalated cases involving suspected session hijacking or credential theft.

### Afterschool Educator

Cara Children's Center — Letterkenny, Ireland

May 2025 – Present

- Designed and delivered structured educational programs while maintaining compliance with child protection policies.
- Demonstrated adaptability and clear communication with parents and multidisciplinary staff.

## EDUCATION

### MSc in Blockchain Technologies and Application

Atlantic Technological University · Jan 2025 – Apr 2026 · First Class Honours (1:1)

### Bachelor of Science in Information Technology

Jai Hind College, Mumbai · 2020 – 2023

### HSC, Business/Commerce, General

Thakur College of Science & Commerce

## TECHNICAL SKILLS

**Languages:** Python, JavaScript, Solidity, Rust, Java, C++, C#, PHP, R, XML

**Security:** Burp Suite, Wireshark, Nmap, Metasploit, OWASP, Digital Forensics

**Blockchain:** Web3.js, Ethereum, Smart Contracts, DeFi, Hardhat, Truffle

**Frameworks & Tools:** React, Flask, FastAPI, ASP.NET, .NET, Streamlit, MongoDB, MySQL, Hadoop, Hive

**Hardware & IoT:** Arduino, Raspberry Pi, ESP8266, Cisco, Packet Tracer, Proteus

**Design & Other:** Unity, Figma, Canva, Framer, LaTeX, Android Studio, Visual Studio, NetBeans

## CERTIFICATIONS

- Junior Cybersecurity Analyst Career Path — Cisco
- Introduction to Digital Forensics — Security Blue Team
- Encryption and Cryptography Essentials — IBM
- Introduction to Cybersecurity Essentials — IBM
- Cybersecurity Professional — Google
- Solidity Advanced: Secure Smart Contracts & DApp Development — Packt

- Information Security Fundamentals — EC-Council
- Decentralized Finance (DeFi) Infrastructure — Duke University
- Web3 and Blockchain Fundamentals — INSEAD
- Blockchain Security — Infosec
- Blockchain Basics — Coursera
- Introduction to Cloud Identity — Google Cloud Security
- Ethical Hacking Essentials — EC-Council

## SELECTED PROJECTS

- **AI Car Game on Unity 3D** — Racing game with AI opponents using pathfinding, obstacle avoidance, and difficulty scaling.
- **Directory Traversal Attack Simulation** — Identified directory traversal vulnerabilities using Burp Suite and PortSwigger Labs.
- **Hotel Management System** — PHP/MySQL app for room booking, check-in/out, staff and payment management.
- **Smart Mining with Neural Networks** — Deep learning models for predictive analysis and resource optimization.
- **Heartbeat Monitor Using Arduino** — IoT patient monitoring with Pulse Sensor, ESP8266 and LCD display.
- **Simulation of Office Network** — Cisco Packet Tracer design with VLANs, OSPF/RIP, NAT and access control.
